

Basic Course :: Petroleum Geophysics

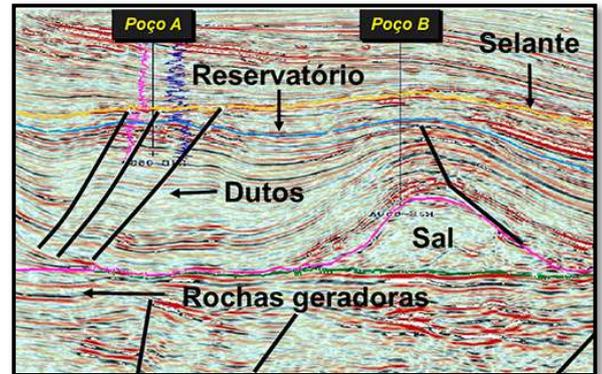

Seismic methods and their applications in oil exploration and production.

Course type: LIVE STREAMING (05 days, 20 hours)

Classes in preparation

Time: 14 - 18h (Brazilian time zone)

Cost: € 750 + VAT

Objectives

Upon completing this course, participants are expected to:

- Understand the basic concepts related to the seismic method,
- Develop skills to recognize geological features through seismic reflection.

Content

- Introdução a geofísica, métodos sísmicos, aquisição, processamento e interpretação sísmica.

Who should participate

Geologists, geophysicists and engineers working in the exploration and production of hydrocarbons.

Instructor

- **Ivanise Wolff**
